OUR HISTORY

Canada's Highest Quality Doors, Since 1912

Celebrating Over 100 Years In Business

Richards-Wilcox was incorporated in Canada in 1912, making us the oldest door company in the world. We're proud of our long history of quality products and we've built upon that history to bring you the exceptional line of residential garage doors we offer today.

At Richards-Wilcox, we are committed to making the next chapter of our history just as exciting as the first. We are passionate innovators of garage door design and desire to be the highest quality door systems manufacturer in the world.

R-W AUTHORIZED DEALERS

A door is only as good as its installation. That's why our doors are only installed by Authorized Dealers. This process ensures that every installation meets our standards of quality.

MADE IN CANADA

Richards-Wilcox Canada has been in business for over 100 years; from parts, hardware to panels, R-W doors are proudly made in Canada.

LIMITED LIFETIMER™ WARRANTY

There are enough worries in life – your garage door shouldn't be one of them. When you choose Richards-Wilcox, you've chosen the best garage door you can buy and we'll back that up in writing with our Limited Life-Timer™ Warranty.

WEATHERLOCK™ SYSTEM

Unique Section Joint & Perimeter Door Seal System

Landmark doors incorporate R-W's exclusive WeatherLock™ Section Joint. R-W's modified tongue and groove joint moves the joint closer to the exterior of the door face to limit air and water infiltration, while providing unyielding section strength and integrity. R-W's Dual Fin, Triple Contact Weather Seal is engineered to seal out dirt, bugs, wind, snow and water and match up beautifully with most garage styles and colors. Our Arctic Grade Bulb Shaped Bottom Seal with a rust resistant Dual Contact aluminum retainer increases the strength of the bottom of the door.

ENGINEERED GARAGE DOOR SYSTEM

Our Garage Doors Last A Lifetime

Engineered and tested door systems that conform to the highest industry standards and regulations. R-W manufactures all door panels and major hardware components, giving us complete quality control from start to finish.

NEUFOAM™

It's What's Inside That Counts!

In order to achieve the highest thermal values and stability, R-W sections are evenly filled with environmentally friendly CFS/HCFC-free Neufoam™. The higher density polyurethane insulation in a computer controlled continuous process provides uniform insulation, superior adhesion and excellent strength to the door panels.

TRU-BALANCE™ DRUM SYSTEM

Safely Manually Operate Your Garage Doors In Emergency Situations

The patent pending TruBalance™ Drum System provides doors built with a heavy weighted glazed top section with up to an 87% better balance than industry standard. This improved drum configuration delivers a smoother operation, and more control, as the door moves through the track radius in to the horizontal plane.

Homeowners will have a piece of mind that they can safely operate their garage door with ease in emergency situations. TruBalance™ also reduces the load on your electric door opener extending the service free life span.

INTRODUCING THE **R-W Landmark** Series™

The Newest Line of High-Performance Garage Door Systems By **Richards-Wilcox.**

Since 1912, Richards-Wilcox Canada has been manufacturing quality doors in Canada for over 100 Years. Richards-Wilcox Residential Doors are not only one of the strongest, most efficient door systems in the world, but also offer a complete range of residential garage doors that will make your home look beautiful for years to come.

WHY RICHARDS-WILCOX?

BUILT TO LAST

Door sections are constructed from high-strength, rust-resistant galvanized steel and coated with a baked-on polyester paint finish. Which means your door will last a really, REALLY long time.

GREEN COMES STANDARD

Our Neufoam™ polyurethane insulation is zero ozone-depleting to help reduce greenhouse gas emissions. Woodgrain embossing simulates real hardwood without depleting our forests.

WEATHER THE CLIMATE

Built to withstand many different weather conditions, our doors have a continuous polyurethane insulated core, arctic-grade bottom seal and dual-seal section joints to help reduce air flow and lower your energy costs.

STEEL IS THE NEW WOOD

Authentic woodgrain texture on panels gives you the aesthetic of wood without the cost or hassle of maintaining it.
